

Reviewer 1 (Tushar): Loved the examples used throughout the presentation to explain the concept better. Very clear and concise.

Reviewer 2 (Nicholas Panaccione): Interesting presentation using examples such as youtube video compression. Had good examples and figures that helped illustrate the importance and function of the algorithm.

Reviewer 3 (Stephen): Great test cases. I liked how you showed the compression ratio and talked about how some files could be compressed more than others.

This feedback was helpful because it told me what aids were helpful in conveying my algorithm and research. It also helped me decide what tests and figures to include in my final report. So that was nice to know early on what was working and what wasn't.
